

REMARKS

Claims 34-51 remain in this application, and claims 1-33 were previously canceled. Reconsideration of the application is requested.

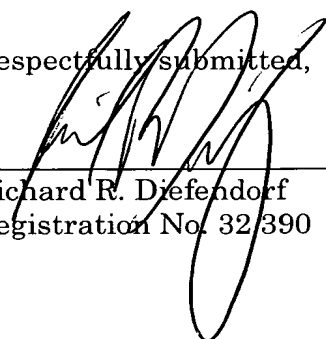

Independent claim 34 is rejected, along with certain dependent claims, as anticipated by U.S. Patent 4,706,615 to Scadding. Reconsideration is requested. Claim 34 is amended above to more particularly define the invention. It is respectfully submitted that the Scadding system does not include (1) a supporting frame having a top part as recited, (2) an air guiding element constructed in one piece with that top part, (3) exterior supporting frame side cheeks to which that air guiding element is connected, or (4) a rear upper cross member edge to which the air guiding element is connected as claim 34 defines. Nothing noted by the Examiner, moreover, suggests modifying the Scadding system so as to meet the limitations mentioned, moreover, and it is further submitted that currently amended claim 34 is patentable. The rest of the claims in this application are dependent claims and are patentable as well.

If there are any questions regarding this Reply or the application in general, a telephone call to the undersigned would be appreciated since this should expedite the prosecution of the application for all concerned.

If necessary to effect a timely response, this paper should be considered as a petition for an extension of time sufficient to effect a timely response. Please charge any deficiency in fees or credit any overpayments to Deposit Account No. 05-1323 (Docket #028987.52499US).
